

PROFITABLE.

Increase Your Production and Lower Your Cost Per Ton with the UltraMax[®] 1600-69.

- ◆ Legendary UltraMax[®] design
- ◆ High production / high throughput
- ◆ High reduction ratio exceeding 24:1
- ◆ Less material prep required
- ◆ Fully lined hopper
- ◆ Heaviest solid-steel rotor in the industry (13 tons)
- ◆ 68" x 20' feeder
- ◆ Available standard 500 HP electric, optional 800 HP and 521 HP diesel available
- ◆ Production capacity up to 800 TPH

EAGLE CRUSHER INTRODUCES THE LATEST ADDITION TO THE ULTRAMAX[®] SERIES: UM 1600-69

High-Production Plant Features the Heaviest Solid-Steel Rotor in the Industry.

GALION, Ohio –Eagle Crusher Company, based in Galion, Ohio, introduces the latest addition to its UltraMax Series, the massive 1600-69. The high-volume plant is highly versatile and self-contained. The crusher features the legendary UltraMax[®] design and a sculptured 3-bar rotor made of solid-steel.

The portable UltraMax 1600-69 high-volume primary/secondary impact crushing and recycling plant produces cubical product at a lower cost per ton in the toughest aggregate and recycling applications. With a superior 3-bar rotor designed for optimum penetration, less wear and increased profitability, the UltraMax 1600-69 processes a wide variety of feed material at high capacity (800 TPH). In addition, the plant's 3-stage crushing action results in a high crush count and reduction ratios in excess of 24:1.

Eagle Crusher's crushing and recycling plant includes the UM 69 impactor. With a 68" x 20' feeder, a 13 ton sculptured solid-steel rotor—the heaviest in the industry—the shock of huge, slabby, concrete and asphalt is absorbed with ease.

The UM 1600-69 is powered by a standard 500 HP electric, optional 800 HP electric, or 521 HP diesel engine.

As with all Eagle Crusher UltraMax Series plants, the 1600-69 features a sculptured 3-bar, solid-steel rotor backed by the industry's first 5-year rotor guarantee.

Galion, Ohio-based Eagle Crusher Company, known to its customers and the industry as Team Eagle, manufactures a complete line of heavy-duty, impact crushers, portable crushing systems, screening plants, and conveyors for the aggregate and recycle markets. Team Eagle also offers flexible financing programs and backs its equipment with superior service and parts support. For more information, contact Team Eagle Sales at Eagle Crusher Company, Inc., P.O. Box 537, Galion, Ohio 44833. Telephone (800) 25-EAGLE or (419) 468-2288; fax (419) 468-4840. Email: sales@eaglecrusher.com; web site www.eaglecrusher.com.
